

FOR IMMEDIATE RELEASE:

Cannabis Seed Retailer Dr. Green Now Offering Free Seeds With BITCOIN Payment

Online cannabis seed retailer Dr. Green is pleased to announce acceptance of BITCOIN payment, a new peer-to-peer payment system that eliminates the “middleman,” i.e. banks. Each customer who pays via BITCOIN receives five free cannabis seeds with purchase.

Los Angeles, CA (PR WEB) May 12, 2014 - Worldwide cannabis retailer Dr. Green is thrilled to announce [BITCOIN](#) as a new payment method, and will provide customers with five free feminized or auto-feminized cannabis seeds every time this method is used. Dr. Green sells a wide range of seeds from suppliers around the world for commercial selling, medical and recreational use.

BITCOIN continues to dominate as a popular payment option, and Dr. Green is offering free seeds “without any limitations” to customers who use this modern transaction choice. BITCOIN allows customers to pay for their seeds anonymously—simply choose ‘Pay with BITCOINS’ and scan BiDi with a mobile or BITCOIN app to confirm payment. The whole process takes less than one minute. Credit cards and international debit cards are still accepted among other payment types. All orders are shipped quickly and discretely to customers’ doorsteps.

Customers are no doubt impressed by Dr. Green’s impressive seed selection, which features feminized, indoor, outdoor, regular and autoflowering variations. The retailer’s highly-popular feminized seeds include Amnesia, New York Diesel, Bubblegum, Jamaican Domina and AK-47, while autoflowering options include Auto Bob Marley, Super Skunk Auto, Auto Jack Herer and Auto Black Domina.

About Dr. Green:

Dr. Green is a worldwide cannabis seed retailer offering a wide range of only the highest-quality seeds at affordable prices to enthusiasts around the world. Seeds come from the most reliable mother plants, ensuring customers receive what they desire in terms of yield as well as quality. The retailer’s substantial inventory “almost guarantees” no customer is disappointed when it comes to choice, and all packages are thoroughly inspected for shape and color before shipping to client doorsteps. Dr. Green is also renowned for its exceptional customer service department, which offers novice growers advice on genetics, nutrition, lights, environments and much more.
