Welcome to Intermountain Precision Sharpening! We're here to provide the highest-quality blade and tool sharpening services in the Heber Valley area. Our team of expert machinists sharpens each and every blade that comes into our shop by hand, and never use automated machines that leave room for serious error.

It is our mission to provide the finest sharpening of woodworking tools and replacement products available in the Intermountain West, and to do so for very competitive prices. We strive to be "the sharpest tools in the shed" and return tools to customers in like-new or better condition.

Commitment to Quality

At Intermountain Precision Sharpening, our philosophy is simple. We make a very solid point of providing residents and company owners with the customized service they should expect from local businesses, and go above and beyond typical customer service standards to meet clients' needs. We provide the same level of outstanding service whether you're a regular customer or a "one-timer," and are always willing to move mountains (pun intended) to make our clients happy. When you work with us, you get all we have to give you as our customer. Period.

You're the best at what you do, and we're the best at what we do. We believe in supporting fellow local businesses and helping them succeed, and strive to give our clients what they need to thrive without the extra cost. Part of our job is to build lasting relationships with customers, but we never resort to pushy sales tactics and other means that put people off. We start slowly and allow relationships with our clients to evolve naturally. You'll discover that it simply makes sense for us to do business together!

Our rock star staff is always looking for a better way of doing things, whether in our craft or in our customer service presentation. If there's anything we can do to meet your needs more effectively, please let us know! We're always happy to make adjustments that result in very satisfied customers.

Dedication to Safety

Using dull tools not only results in low-quality finished products, but it's also a serious hazard. Dull blades are much more dangerous than sharp blades, as they do not serve their purposes. They require a lot of force to cut through an object, whereas sharp blades cut through cleanly and easily. Because extra force is often used when working

with a dull blade, the tool can slip or twist in a way that results in injury. Cuts from dull blades are also more severe than those from sharp blades, as the blade rips rather than slices flesh. This means longer healing time.

Keeping blades sharp is much easier than waiting around for them to dull and potentially cause serious injury. Allow our team of highly qualified machinists to provide the expert sharpening services your business needs to never miss a beat. Whether your business is centered around carpentry or logging, or you require sharp blades for your restaurant, retail store, school, or university, we're here to help you ensure services continue without interruption. Trust us to sharpen your rotary saws and gardening sheers. Have us help you make certain kitchen knives stay perfectly sharp. If you or your staff uses blades as part of daily work, count on us to provide the meticulous sharpening services you require.

Intermountain Precision Sharpening's owner Jim Pennington has over 20 years' experience in the machining industry under his tool belt, and never puts his name on anything that's not the very best. Intermountain Precision Sharpening is not his first business, a fact that has given him the competitive edge he needs to create customer service standards that reach far beyond what similar businesses offer.

Working with Intermountain Precision Sharpening means enjoying:

- Unparalleled customer service that's always personable and meets individual needs.
- Machinists who perform all sharpening by hand and take responsibility for their work.
- The highest-quality products on the market.
- Assistance in emergencies that arise with every business.
- And so much more!

Allow us to handle all your blade-sharpening needs and never worry about working with dull tools again. We'll make sure your blades leave our machinists' hands in perfect condition without making your wallet weep. Give us a call or send us a message today and learn more about how we can help you!
